PROJECTS

ATM Simulator System
Key Skill- Java, SQL, Swing, JDBC

It is application based project .

- **The system mainly used by the bank clients. When a client comes to ATM centre to update and delete their account. It reduces the time consumption and lot of paperwork. For any single operation it involves numerous references and updating also takes subsequent changes in other places**

Employee-Management-System
Key Skill- Java, Spring Boot, MySQL, Jdbc

It is application based project .

- **An employee management system is a software, that helps your employees to give their best efforts every day to achieve the goals of your organization. It guides and manages employees efforts in the right direction. It also securely stores and manages personal and other work-related details for your employees**.

Student management system
Key Skill- Java, Spring , MySQL, Jdbc.

It is application based project .

- **Student management system using Java and Spring is a web-based application. Student Management Project is software that is helpful for students as well as the school authorities. In the current system, all the activities are done manually. It is very time-consuming and costly. Our online Student Management System in Java deals with the various activities related to the students.**
